Review title

Regular treatment with formoterol and an inhaled corticosteroid versus regular treatment with salmeterol and an inhaled corticosteroid for chronic asthma: serious adverse events

Review type

Intervention review

Review details

The project is an update of the review named above. Once this review is complete, there are 2 overviews that need to be completed. The fellow could potentially be involved with the update of one or both of the overview.

You can see the PICO in [the published review](#).

Review current status – please indicate current status of review (e.g. protocol on PROSPERO, searches started etc.)

The project is an update of the review named above. We are ready to begin work on the update (i.e. a review of the PICO and updating of any methods to meet current standards, then screening the search can begin) when the fellow is appointed.

Estimated start and completion dates* – please note these are subject to change and flexibility on behalf of the Fellow is required

Begin Spring 2020, complete by end 2020, publish spring 2021 (this is a hard deadline as the review is part of a grant)
