

# EVIDENCE SYNTHESIS IRELAND

## Designing Systematic Searches: An Introductory Workshop

### Background

One of the key features of all evidence synthesis is to conduct a systematic search. Systematic literature searching requires that we plan and run searches in a way that ensures clarity, validity and reliability. Documenting the searching process is vital to ensure transparency and reproducibility.

### Aim

This workshop provides attendees with the knowledge and skills to conduct a basic systematic search of the literature including designing and running searches on key databases and identifying and selecting search filters.

### Learning outcomes

In this course, participants will be enabled to:

- Design a basic systematic search strategy
- Identify and use study-design search filters
- Report the search methods

### Teaching strategies

The workshop will consist of a mixture of short presentations and small group activities with practical exercises. **Please bring along your laptop for the exercises.** Questions and discussion are encouraged. A short reading list/activity list will be sent to enrolled attendees in advance of the session.

### Date:

**21st June 2024**

### Time:

**09:00 – 16:00**

### Target Audience:

**Healthcare professionals, academics, researchers, decision makers, librarians, information specialists, and Evidence Synthesis Ireland fellows and teaching faculty who would like to learn more about systematic searching.**

### Location:

**Durkan Theatre,  
St James Hospital,  
Dublin 8**

### Fee:

**Student €70**

**General €180**

**Industry €280**

I R E L A N D

## Designing Systematic Searches: An Introductory Workshop

### Facilitator

Julie Glanville, an independent consultant and trainer in information retrieval. Julie has worked in systematic reviews for more than 25 years as Associate Director of York Health Economics Consortium (YHEC) (2008-2019) and Associate Director at the Centre for Reviews and Dissemination (CRD), University of York (1994 – 2008). Julie was a co-convenor of the Cochrane Information Retrieval Methods Group and is a co-author of the Cochrane Handbook chapter on searching for evidence and the 2020 PRISMA guidance.

### Course content/timetable

21st June 2024	
09:00	An Introduction to Searching for Evidence Synthesis: searching basics.
09:30	Conducting a systematic search/ Translating the research question into a search including identifying the concepts within a search (presentation and activities).
10:30	Break
10:45	Identifying and Using Subject Headings and Text words (presentation)
11:15	Identifying and Using Subject Headings and Text Words (exercises)
12:00	Identifying and Using Methodological Search Filters (presentation)
12:30	Lunch
13:00	Identifying and Using Methodological Search Filters (exercises)
13:30	Peer reviewing search strategies (presentation)
14:00	Peer reviewing search strategies (exercises)
14:45	Break
15:00	Documenting and reporting the search strategy (presentation and discussion)
15:45	Wrap up, discussion and evaluation
16:00	Close
