Andrea Tricco, Knowledge Translation Programme, Unity Health Toronto

Review title

Post-Market Drug Evaluation Queries to inform Canada's Clinical Guidelines

Review type and methods

Rapid Review(s) on a range of drug safety and effectiveness topics within a Canadian context. Fellows will follow PRISMA guidance (Dr. Tricco and Dr. Veroniki are leading updates to PRISMA-RR guidance) and will have the opportunity to contribute to study protocols, title/abstract and full text screening, data abstraction, data cleaning quality appraisal (using ROBINS-I, ROB-2 or similar), report writing to inform clinical guidelines for knowledge users.

Please confirm that no existing review exists that addresses the review question

This is confirmed by the funding agency and their clinical experts prior to project start.

Review information

Canada's Drug Agency (formerly CADTH)

Review details

Not initiated yet. We have a 2-year long term funding arrangement with CDA to carry out a range of post-market drug evaluation queries. For example. previous projects included clinical guidelines on safe and effective treatment for Gonorrhoea infection.

Any specific/desirable requirements for fellow (e.g. clinical expertise, methodological expertise)

Epidemiology background is an advantage given the clinical queries we anticipate. We will provide the necessary mentoring/training for methods.

Estimated start and completion dates*

August 2024 – August 2025
